

ShowerGuard[®] Shower Protection

SHOWER ENCLOSURES

BATH ENCLOSURES

KEEP YOUR TIMELESS DESIGNS LOOKING FOREVER BEAUTIFUL.

ShowerGuard
UltraWhite

ShowerGuard glass is the first shower glass that provides permanent protection against corrosion and discoloration. Manufactured and sealed with Guardian's patented ion-beam process, ShowerGuard shower enclosures will maintain like-new appearance for years to come. Unlike spray-on or wipe-on products, this protection is part of the glass itself, allowing the glass to withstand some of the harshest water conditions.

ShowerGuard
SatinDeco

Shower enclosures made from high-quality acid-etched ShowerGuard SatinDeco bring a silky elegance to any luxury bathroom, while the stunning clarity of ShowerGuard UltraWhite™ makes it the glass of choice for those seeking true color neutrality in their designs. Whichever ShowerGuard product you choose, know that ShowerGuard keeps shower glass looking forever beautiful.

Why ShowerGuard At-a-Glance

Features	Benefits
Patented ion-beam technology seals glass against corrosive agents	Resistant to hard-water stains and easy to maintain with minimal cleaning
Resistant to hard-water stains	Protection is part of the glass and never needs to be reapplied
Backed by a limited lifetime warranty	Longer life cycle and less frequent replacements required

ShowerGuard Performance

Shower glass that's permanently sealed to keep showers looking as beautiful as the day they were installed.

Standard glass corrodes

Hard water, cleaning products, and even soap and shampoo you use every day can take a toll on standard shower glass, leaving it full of tiny pits and ridges that attract and hold scum. Constant exposure to these contaminants causes a chemical reaction that actually roughens the surface of the glass. When that happens, spots, residues, stains, and scale build up, and it becomes almost impossible to keep your glass clean.

ShowerGuard glass resists corrosion

The surface of ShowerGuard glass is sealed against attack from chemicals and shower contaminants, so scum has nothing to grab on to. ShowerGuard glass remains smooth and easy to clean. And unlike spray-on or wipe-on treatments that eventually come off, the coating on ShowerGuard glass is permanent. So a ShowerGuard glass shower stays beautiful forever.

The ShowerGuard Difference

In independent laboratory testing, ShowerGuard and other competitive products were exposed to hard water with dissolved silicates, which can be a challenge for any shower glass. After repeated cycles, other products developed permanent stains, while ShowerGuard remained clear and easy to clean.

ShowerGuard glass care & maintenance

ShowerGuard's patented technology helps keep minerals, scale, and soap scum from sticking. A soft cloth or wet sponge and most common household cleaners are all you need for periodic maintenance.*

Water Quality	Effective Cleaners	Recommended Cleaners	Recommended Cleaning Frequency**
soft water	any glass cleaner	Windex®	as needed
hard water	any acidic glass cleaner	solution of 50% water and 50% vinegar	approximately once every 15 showers
hard water with dissolved silica	cleaners with mild abrasives	Soft Scrub® Lemon, Kaboom® Shower, Tub & Tile	approximately once every 10 showers

* For a complete list of approved cleaning products, please visit ShowerGuardGlass.com.

** Cleaning frequency recommendations are guidelines only. Actual cleaning frequency will depend upon humidity, degree of water hardness, shower temperature, and other variables. In cases with extremely high silica content, it may be helpful to squeegee as needed between cleanings.

Characteristics

ShowerGuard is created with a patented ion-beam process, sealing the surface against corrosion from chemicals and water. ShowerGuard is virtually invisible and can be easily cleaned using basic soap and water. For a full list of approved cleaning products and recommendations for cleaning solutions for your water type, visit ShowerGuardGlass.com.

Availability

ShowerGuard is available on clear float glass, UltraWhite low-iron glass, and SatinDeco acid-etched glass. It is available in 6mm, 10mm, and 12mm thickness. All ShowerGuard glass is tempered.

Fabrication

All ShowerGuard glass can be cut, drilled, beveled, edged, notched, silk screened, tempered, and laminated.
